FS120 STD Cells User Product Information

Rev 2010.Q1

1. Product Information

This document provides important product information regarding the FS120 STD cells.

The information in this User Product Information applies to FS120 STD cells, revision 2010.Q1

2. Delivery Structure

The delivery is organized in the following directory structure:

1. lib – the library folder
    a. cdl - cdl netlist for LVS with VDD and VSS defined as local and cdl netlist for LVS with VDD and VSS defined as global.
    b. dfii - symbols for all cells
        i. .simrc - see instructions below.
    c. doc - datasheets
    d. gds - gds for all cells
    e. lef - lef abstract
    f. liberty – three corners timing information
    g. spc - spice netlist for all cells
    h. spc_simple - spice netlist for all cells without parasitics.
    i. verilog - verilog model for all cells.
2. Tech
    a. lef - technology lef file and map file for first encounter

COMPANY CONFIDENTIAL - EXTERNAL

3. KNOWN PROBLEMS & LIMITATIONS

1. dfii/.simrc - place the file in your home directory(~/), When genenerating cdl netlist out from symbol the order of pins become correct
2. The following cells are **not** to be used:
    a. gcnfnn1
    b. gcnfnn2
    c. gcnfnn4
    d. gcnfnn7
    e. gcnfnna
    f. gcnrnn1
    g. gcnrnn2
    h. gcnrnn4
    i. gcnrnn7
    j. gcnrnna
    k. mx08*

COMPANY CONFIDENTIAL - EXTERNAL

PROPRIETARY NOTICES

This User Product Information contains data proprietary to Tower Semiconductor Ltd. and may not be reproduced, recorded, or transmitted in any form without prior written consent from Tower Semiconductor Ltd.

Due to continuing product development, specifications, capabilities and features are subject to change without notice.

LIMITATIONS, DISCLAIMERS AND INDEMNITY

Products that use Tower processes are not authorized, designed, or intended for use in, no warranty is made with respect to use of such products in, and Customer shall not permit the use of such products in the design, construction, operation or maintenance of any nuclear equipment, aircraft except with Tower's written approval, or weaponry. Customer shall indemnify, defend and hold Tower (including its employees, agents and affiliates) harmless from and against any and all loss, cost, expense (including, without limitation, attorneys' fees and costs), liabilities or damages associated with any claims, actions or proceedings brought against Tower (1) relating to any such unauthorized use of such products or (2) relating to use of such products in, or use of Tower processes for the manufacturing of critical components in, life support of life critical medical devices or systems, including but not limited to use in any surgical implant into the human body. For these purposes, "life support of life critical medical devices or systems" are devices or systems which (a) are intended for the surgical implant into the human body; or (b) support or sustain human life, and whose failure to perform can be reasonably expected to result in a significant injury to, or death of, the human subject, and a "critical component" is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

The information contained within is the exclusive property of Tower Semiconductor Ltd, and may not be distributed, reproduced or disclosed in whole or in part without prior written permission of Tower Semiconductor Ltd.
